Restaurant Doors

Restaurant Doors

Make a Statement with Chase Doors!

Chase Doors offers the broadest range of doors in the industry, from traditional doors to avant-garde. And they do it beautifully. They keep heat, clutter, clinking glasses, banging pots and pans in the back room where they belong. Chase has the capabilities to match any décor or design motif. And with Chase you get factory-direct-style pricing and a nationwide network of door specialists that provide unmatched service and support. *You get it all with just one call.*

Mix and Match Standard Doors or Specify Your Own Custom Options

Chase Doors is the largest and most successful manufacturer of traffic doors in the world. With over 75 years of experience in designing and creating specialized door styles, Chase Doors can help you personalize your door to match any décor. Or if you prefer you can choose from one of our pre-configured combination of features to make ordering easy. Pre-configured doors can be found on pages 3 through 5.

Why Choose Chase Doors?

- Visual separation with aesthetic appeal and the capability to match any décor or design motif
- Durable long-lasting construction
- Lightweight designs that open and close easily
- A variety of cores provide sound attenuation and thermal separation
- Better, faster on-time delivery
- We have the best and largest field sales organization and inside customer service support staff in the industry
- Prices that match factory-direct but also provide service and support

GraphicsDoor™

Store décor has become an essential element in creating a positive, lasting impression on your customers. Powerful, large formatted digital graphics stimulate the atmosphere and provide a fresh new look in both new construction and remodels. Highlight a theme or food specialty. Enhance the total visual experience with unique transitions or dramatic visual breaks.

2000 Series

Custom Restaurant Doors Chase SD 2000 Service Door Series

- The doors are constructed with .063" anodized aluminum. A decorative, high-pressure laminate finish is available on one or both sides.
- The leading edge is formed in a diamond for vertical panel stiffness and edge protection.
- 1" thick by 5" wide back edge spine is reinforced with 3/8" plywood and capped with aluminum for added strength and durability.
- Proven stainless steel hinge system mounts to the jamb with offset cam system and hardened rollers, for years of maintenance free service.
- A variety of options including impact plates, bumper strips and lower hinge guards can be added to meet your exact requirements.
- Available in single, double or cafe styles.

Shown with optional impact plates

Kitchen Classic – Pre-Configured Doors Chase SD 2000 Swinging Door Series

Lightweight aluminum with a natural matte finish. Add a warm wood laminate. Create a statement with a window. Classic looks with contemporary kitchen appeal. An economical, light duty door that allows easy access between seating and kitchen areas by wait staff, buss persons and cleaning crews. Reinforced back spine and exclusive diamond fold front edge for superior rigidity. Soft Touch™ stainless steel gravity hinge for easy opening. Choice of large windows for accident reducing visibility. Add an optional 12" or 18" kickplate or full coverage 48" impact plate for durability and aesthetic appeal. Available as a single panel door with left or right hand hinge. Use a double door for larger openings.

Gate, Café, Saloon & Service Doors

Chase Self-Standing and In-Jamb Gate, Café and Saloon Doors

Gate, Café and Saloon doors provide visual separation and aesthetic appeal. They are ideal for use in potentially dangerous areas where small children and other customers might wander and harm themselves. All café style doors come standard with the XL Ultra Soft Touch™ Hinging System, an industry exclusive. The XL Hinge is "hidden" in the back spine eliminating unattractive panel cutouts.

- Available in a variety of finishes including high pressure laminates, aluminum, stainless steel, ABS plastic or SRP (stress relieved high-density polyethylene).
- Internal construction is available in aluminum, wood, ABS plastic or SRP polyethylene.
- Self-standing doors are an excellent option in areas where some sort of wall structure does not exist to hang a double-acting door.
- Optional gravity style hinges are available.

In-Jamb Saloon Style Door

SST 2000

Chase SST 2000 Series

Whether you are looking for a high-tech, retro or simply a classic look, the Chase SST 2000 stainless steel door adds an upscale touch of class to any decor.

- Constructed with 16 gauge stainless steel with #4 brush finish. It will not warp or crack and can outlast aluminum. It's extremely durable and offers a beautiful aesthetic appeal.
- Standard windows are 9" x 14" acrylic set in black rubber molding.
- The full length back spine contains the XL Series Ultra Soft Touch hinging system that helps the door close fast and allows for an extra wide swing, reducing damage from "wrapping" the jamb.

Chase XLP 5000 Series

The revolutionary new Chase XLP 5000 double acting traffic door offers a contemporary "designer style" look with a 3 dimensional surface.

- Lightweight, hollow core plastic shell with integrated, molded-in bumpers compresses and then flexes upon impact accelerating the opening speed. People and product can get through the door even faster than before.
- To aid in safety the door comes standard with a large 7" x 30" oblong ADA and OSHA compliant window. To complement the door a black rubber molding is used.
- The full length back spine contains the XL Series Ultra Soft Touch hinging system that helps the door close fast and allows for an extra wide swing, reducing damage from "wrapping" the jamb.

XLP 5000

NW 3011

(shown with optional XLS Series Hinge System)

Chase NW 3011

The Chase NW 3011 has been engineered to cost effectively enhance traffic door functionality.

- The simple and attractive door panel contains no wood or organic material. The textured ABS face sheets and extra wide perimeter ABS frame encapsulate an extruded, polymer honeycomb core.
- Designed for easy two-way swing, this lightweight door opens manually with minimal resistance and gently closes by gravity.
- 12" Kickplates are standard and add additional strength and durability to the door. Larger sizes are available.

Custom sizes and colors available. Please consult factory for exact color match and details.

Additional Products by Chase

Strip Doors

Econo Max Strip Doors are an economic alternative for applications where temperature control and environment separation is required. Strip Doors are commonly used as a secondary barrier so that the primary door can be left open for extended periods to facilitate workflow.

- Econo Max Strip Doors are inexpensive and usually pay for themselves in less than one year.
- Our mounting systems make installation and strip replacement fast and easy.
- We offer the largest selection of strip material size, colors, types and grades in the industry.

EconoClear™ Flexible Doors

Flexible doors are a cost effective way to provide a swing door on openings for light traffic applications. These traditional doors provide a maximum opening clearance for wide loads.

- Constructed with clear .120 PVC vinyl for complete visibility.
- Door panel is reinforced at attachment points for durability.
- Self-closing hinge is corrosion resistant.
- Optional low temperature or anti-static material available.
- Easy installation and virtually maintenance free.

Cold Storage Doors

ColdGuard™ Cold Storage Doors combine the newest technology and practical design features to meet the demanding requirements of the food service industry. The doors are manufactured with fiberglass reinforced pultrusions (FRP), extruded polymer casings and non-CFC foamed-in-place polyurethane insulation. This innovative design produces a strong and high impact door panel.

- Tight seal, moisture resistance and superior thermal control.
- Easy installation and easy operation.
- All doors available in single swing, bi-parting swing, single slide and center-parting.
- Doors can be manually or power operated.

Custom Manufactured C-Channel, KD Tubular Frames, and Traditional Drywall and Masonry Hollow Metal KD Frames

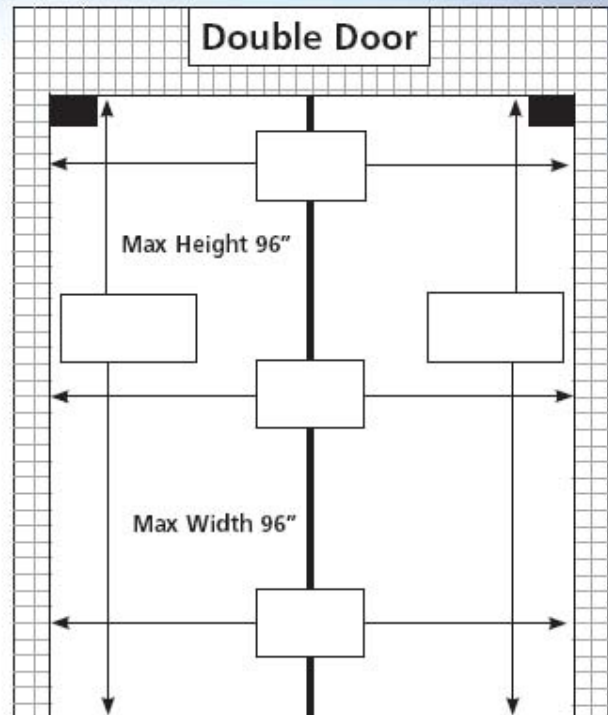

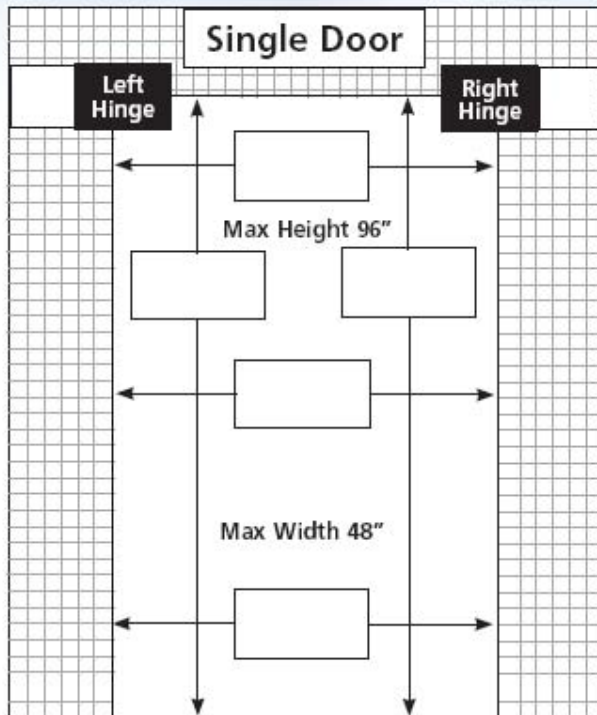

- C-Channel steel jamb wraps are designed to fit over the wall and are constructed with carbon steel or optional stainless steel. Gray powder coating is standard, optional colors include black, beige and white.
- KD tubular frames are constructed carbon steel or optional stainless steel. Gray powder coating is standard, optional colors include black, beige and white.
- Traditional drywall and masonry hollow metal KD Frames are constructed using galvanized steel and are shipped prime painted.

Getting The Right Door Size

First, measure the height of your opening at each side (NOT YOUR DOOR).

Next, measure the width of the opening at the top, middle and bottom.

Finally, choose a left or right side hinge from customer area side (Not Kitchen Side).

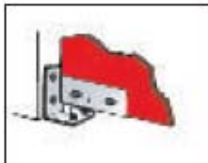

Opening dimensions in inches

Options and Accessories

Classic stainless steel "E" hinge has a removable cover for easy maintenance.

Standard heavy-duty stainless steel bottom hinge pin stabilizes the panel in the frame.
